### **Reasons for Allowance**

1. Claims 1-16 are allowed. The cited prior arts taken alone or in combination fail to teach a method for tracing an instrumented program using a thread, and a computer processor for tracing the instrumented program, as recited in the manner in the independent Claims 1 and 10 respectively.

Examiner has relied on the references of record:

Prior art of record, Uhlig et al., "Trace-Driven Memory Simulation: A Survey", where Uhlig's teaching includes the probe-based trace collection and execution of trap instructions in a kernel space.

Prior art of record, Tamches, "Fine-Grained Dynamic Instrumentation of Commodity Operating System Kernels", where Tamches discloses tracing instrumented programs and loading code patch into a kernel in the manner in the specification.

However, Applicants have traversed all the references of record. See all the Applicant's remarks (filed on 05/08/07). Particularly, Applicants contended that the teaching in Uhlig cannot be a scratch space (Remarks: p.7), and Uhlig does not teach the program counter ((Remarks: p.8)).

Applicants also contended that Tamches fails to disclose setting program counter to point to scratch space, but only copied (Remarks: p.9).

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ted T. Vo whose telephone number is (571) 272-3706. The examiner can normally be reached on 8:00AM to 4:30PM.
